Communicable Disease Center
Enteric Bacteriology Laboratories
P. O. Box 185
Chamblee, Georgia

Dr. J. Lederberg
Department of Genetics
University of Wisconsin
Madison 6, Wisconsin

Dear Dr. Lederberg:

Under separate cover I am sending you a culture which should gladden your heart if you are still working on the genetics of motility. This is a flagellated, nonmotile culture of *S. typhi* which we received from Michigan last week and which had been classified there as a member of the pullorum-gallinarum group. It is the first typhoid culture of this sort that I have seen. I hope it will be useful to you.

With best wishes, I am

For the Officer-in-Charge, Bacteriology Section

Sincerely yours,

Phie

Philip R. Edwards, Ph. D.
Bacteriologist-in-Charge
Enteric Bacteriology Unit
